p.3

1. Since you have a lot of time
available, would you consider
a DURACON 2000A
with a 1000' cable
length? I think it would be
a good idea - about all
we can do is blow off one unit.
2. I also wanted to add options to
the DURACON 2000A system.
I would like to add a 1000' cable
length and a 1000' cable reel
so that we can move the unit
from one end of the building to the other.
